DETAILED ACTION

1. This is in response to the RCE filed on 5 February 2007.
2. Claims 32-38 are pending in the application.
3. Claims 32-38 have been allowed.
4. Claims 1-31 have been cancelled.

Continued Examination Under 37 CFR 1.114

5. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5 February 2007 has been entered.

Response to Arguments

6. Applicant's arguments, see pages 7-14, filed 5 February 2007, with respect to claims 32-38 have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Allowable Subject Matter

7. Claims 32-38 are allowed.

The following is an examiner's statement of reasons for allowance:

The current application is directed towards an authentication communication system that includes an storage medium having an area for storing digital information and an access device for reading/writing digital information from/into the area. The access device authenticates whether the storage medium is authorized according to a challenge-response authentication protocol in which scrambled access information generated by scrambling the access information

which shows the area is used. The storage medium authenticates whether the access device is authorized. When the access device and the storage medium have authenticated each other as authorized devices, the access device reads/writes digital information from/into the area in the storage medium according to the access information separated from the scrambled access information by the access device.

Regarding independent claims 32, 35 and 38, the prior art does not disclose, teach or fairly suggest transmitting scrambled access information. The prior art does not disclose, teach or fairly suggest that the access information includes information designating an area in the storage medium used for storing digital information. As shown in figure 3 of the current application, the access information is 32 bits long and is composed of address information showing an address of an area in the data storage unit in the memory card and size information showing a size of the area (page 8 of the specification). The prior art does not disclose, teach or fairly suggest that access information is composed of an address of an area in the data storage unit and size information showing a size of the area.

Any claims not directly addressed are allowed in their virtue of dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
